Authorization to Provide Treatment to Minors

It is the desire of Dermatology Associates to have a parent or legal guardian accompany all minor patients to each appointment. At times however, it is possible that minors may arrive at the office unaccompanied, or may be accompanied by another adult not legally able to provide authorization for treatment.

Authorization to provide medical treatment to minors must be obtained from a parent or legal guardian. All patients under the age of 18 need to have a parent or legal guardian provide written consent, or oral telephone consent for each procedure, prior to being seen and treated by a practitioner. Exceptions to this will be in accordance to Iowa State and/or Federal Law.

Below is a general consent release for the practitioners of Dermatology Associates to treat your minor dependent. This authorization to treat the below named minor patient is valid indefinitely or until the minor reaches the age of 18.

**I hereby grant Dermatology Associates permission to treat my child or legal dependent whether they arrive accompanied or unaccompanied for any office visit.**
